LAUREL BRIDGE SOFTWARE HIRES DIRECTOR, BUSINESS DEVELOPMENT

Gregory R. Muller Selected to Lead Sales Effort for DICOM Tools and Application Software

Newark, DE (October 15, 2009) - Laurel Bridge Software, Incorporated (LBS) recently hired Gregory R. Muller to the position of Director, Business Development.

Prior to joining Laurel Bridge Software, Mr. Muller co-founded and co-managed Software Consulting Group from initial formation in 1988 through successful sale to Soluziona USA in 2001, including participation in all due diligence activities required to effectively market, sell, and transition company and employees to its new owner. Software Consulting Group was an enterprise resource planning (ERP) implementation services company that focused primarily in the electric utility nuclear generation industry, and a document/imaging management solutions and services company that focused horizontally across several industries. During his tenure at Software Consulting Group, Greg served in many capacities including Chief Executive Officer and Vice President, Energy Services. As Vice President, Energy Services, Greg managed all practice area activities, including business development, resource planning, and service delivery.

According to Mark Blair, President of Laurel Bridge Software, "We are thrilled to have Greg as a member of our business family and look forward to leveraging his business development and business process expertise along with his high energy level to drive existing product sales in the medical imaging industry and to introduce new product offerings in the broader healthcare industry."

About Laurel Bridge Software, Inc.

LBS is a Delaware-based corporation, specializing in development and deployment of DICOMTM tools and applications for the medical imaging industry, especially in areas related to communication of medical devices, appliances and enterprise medical imaging systems via high-speed local and distributed networks. Engineers from Laurel Bridge Software and its sister company, Blair Computing Systems, Inc., have been developing medical imaging systems for more than fifteen years. Collectively they have a wealth of experience developing PACS networks, modalities, workstations/viewers, archives and protocol or image converter boxes in a variety of configurations. Key customers include AccelaRAD, AGFA, Codonics, Department of Veterans Affairs, DR Systems, Dexela, Faxitron, Franklin & Seidelmann, Hologic, NightHawk Radiology, Siemens Medical, Sonultra, and Virtual Radiologic Corporation.
